

HIGH RELIABILITY HYBRID DC-DC CONVERTERS

DESCRIPTION

The DVSB series of high reliability DC-DC converters is operable over the full military (-55°C to +125°C) temperature range with no power derating. Unique to the DVSB series is a fault tolerant magnetic feedback circuit. Operating at a nominal fixed frequency of 325 kHz per stage, these regulated, isolated units utilize well-controlled undervoltage lockout circuitry to eliminate slow start-up problems.

These converters are designed and manufactured in a facility qualified to ISO9001 and certified to MIL-PRF-38534 and MIL-STD-883.

This product may incorporate one or more of the following U.S. patents:
