Passively Cooled Diode Laser Bar Both Axes Collimated 25 ... 30 W cw

SPL MBxx

Preliminary Data

Features

- Collimated radiation source for cw operation in a sealed housing
- Very low fast and slow axes divergence angle
- No water required, passive cooling through copper mount
- High reliable strained layer InGa(AI)As/GaAs material
- Standard wavelength selection is \pm 3 nm, others on request
- · Low smile, low mechanical tolerances

Applications

- End pumping of rods and fibers
- · Soldering, direct material processing
- · Marking, surface processing
- Medical applications

Safety Advices

Depending on the mode of operation, these devices emit highly concentrated non visible infrared light which can be hazardous to the human eye. Products which incorporate these devices have to follow the safety precautions given in IEC 60825-1 "Safety of laser products".

Туре	Wavelength ¹⁾	Power	Ordering Code
SPL MB81-E	808 nm	25 W	on request
SPL MB94-E	940 nm	30 W	on request

Other wavelengths in the range of 780 nm ... 980 nm are available on request.
