

**DESCRIPTION**

Proliferation of digital portable electronic equipment has created a noisy environment in which all devices become susceptible to Electromagnetic Interference (EMI). Interference from cell phone frequencies of 800-900 MHz and 1.9GHz as well as the growing wireless LAN frequencies of 2.4-6GHz can couple into the audio port of a handheld device and adversely affect its performance. FCC Part 15 sets maximum allowable emission and immunity levels for all digital devices.

LX7206 is an integrated low pass filter with ESD protection that filters out the undesired frequencies as well as protecting the port against both positive and negative ESD voltages. The device is a 3x2 array flip chip and measures 1.5 x 1.0 x 0.65 mm. The small size and profile of this device is ideally suited for portable applications. The absence of leadframe and bondwires minimizes inductance and optimizes the high frequency filter performance. LX7206 exceeds the requirements of IEC61000-4-2 (15KV air discharge and 8KV contact discharge).

**KEY FEATURES**

- Flip Chip construction
- Bi-directional EMI/RFI low-pass filter
- ESD protection with integrated line termination resistor
- Bi-directional TVS protects against negative ESD voltages in audio applications
- Low TVS operating voltage (5.0V)
- Low leakage current
- 0.5mm Pitch Chip Scale Package designed for direct assembly on FR4 PCB using conventional assembly techniques

**BENEFITS**

- Filter response characterized up to 6 GHz
- Low insertion loss in the pass band
- >20dB attenuation in the 800-900 MHz range
- >15dB attenuation in the WLAN frequencies of 2.4GHz and 5.0-6.0 GHz

**APPLICATIONS**

- Cell phones and Accessories
- Personal Digital Assistants (PDA's)
- Pagers
- MP3 Players
- Desktops and Notebook Computers
- Digital Camcorders

**ABSOLUTE MAXIMUM RATINGS**

Peak Pulse Power (tp = 8/20 $\mu$ s ) IEC61000-4-5 .....	250W
Peak Pulse Current (tp = 8/20 $\mu$ s ) IEC61000-4-5 .....	26A
ESD Air Discharge per IEC61000-4-2 .....	30KV
ESD Contact Discharge per IEC61000-4-2 .....	30KV
Operating Temperature .....	-40°C to +125°C
Storage Temperature Range .....	-55°C to +150°C

Note: Exceeding these ratings could cause damage to the device. All voltages are with respect to Ground. Currents are positive into, negative out of specified terminal.
