TOSHIBA Photo-Interrupter Infrared LED+Phototransistor

## TLP801A(F)

## Lead Free Product

Optical Switches

## Position And Rotation Detection

Timing Detection In Copiers, Printers, Fax Machines, Etc.

The TLP801A(F) photo-interrupter can be used for high-speed position detection.

- Gap: 3mm
- Resolution: Slit width $=1 \mathrm{~mm}$
- Fast response speed: $\mathrm{t}_{\mathrm{r}}, \mathrm{t}_{\mathrm{f}}=6 \mu \mathrm{~s}(\mathrm{typ}$.
- High current transfer ratio: IC / IF $=10 \%(\mathrm{~min})$
- Designed for direct mounting on printed circuit boards
- Package material: Polycarbonate

Weight: $0.78 \mathrm{~g}(\mathrm{typ}$.

Maximum Ratings ( $\mathbf{T a}=\mathbf{2 5}{ }^{\circ} \mathrm{C}$ )

| Characteristic |  | Symbol | Rating | Unit |
| :---: | :---: | :---: | :---: | :---: |
| بِّ | Forward current | $\mathrm{I}_{\mathrm{F}}$ | 50 | mA |
|  | Forward current derating $\left(\mathrm{Ta}>25^{\circ} \mathrm{C}\right)$ | $\Delta \mathrm{I}_{\mathrm{F}} /{ }^{\circ} \mathrm{C}$ | -0.33 | mA / ${ }^{\circ} \mathrm{C}$ |
|  | Reverse voltage | $\mathrm{V}_{\mathrm{R}}$ | 5 | V |
| $\grave{\circ}$ <br> 0 <br> 0 <br> 0 <br> 0 | Collector-emitter voltage | $\mathrm{V}_{\text {CEO }}$ | 30 | V |
|  | Emitter-collector voltage | $V_{\text {ECO }}$ | 5 | V |
|  | Collector power dissipation | $\mathrm{P}_{\mathrm{C}}$ | 75 | mW |
|  | Collector power dissipation derating( $\mathrm{Ta}>25^{\circ} \mathrm{C}$ ) | $\Delta \mathrm{PC} /{ }^{\circ} \mathrm{C}$ | -1 | $\mathrm{mW} /{ }^{\circ} \mathrm{C}$ |
|  | Collector current | $\mathrm{I}_{\mathrm{C}}$ | 50 | mA |
| Operating temperature range |  | Topr | -25~85 | ${ }^{\circ} \mathrm{C}$ |
| Storage temperature range |  | $\mathrm{T}_{\text {stg }}$ | -40~100 | ${ }^{\circ} \mathrm{C}$ |

## Markings

Optical And Electrical Characteristics( $\mathbf{T a}=25^{\circ} \mathrm{C}$ )

| Characteristic |  | Symbol | Test Condition | Min | Typ. | Max | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Forward voltage | $V_{F}$ | $\mathrm{I}_{\mathrm{F}}=10 \mathrm{~mA}$ | 1.00 | 1.15 | 1.30 | V |
|  | Reverse current | $\mathrm{I}_{\mathrm{R}}$ | $\mathrm{V}_{\mathrm{R}}=5 \mathrm{~V}$ | - | - | 10 | $\mu \mathrm{A}$ |
|  | Peak emission wavelength | $\lambda_{P}$ | $\mathrm{I}_{\mathrm{F}}=20 \mathrm{~mA}$ | - | 940 | - | nm |
| $\bigcirc$ | Dark current | $I_{\text {d }}\left(I_{\text {CEE }}\right)$ | $\mathrm{V}_{C E}=24 \mathrm{~V}, \mathrm{I}_{\mathrm{F}}=0$ | - | - | 0.1 | $\mu \mathrm{A}$ |
|  | Peak sensitivity wavelength | $\lambda_{P}$ |  | - | 820 | - | nm |
| $\begin{aligned} & \overline{0} \\ & \frac{0}{2} \\ & \overline{3} \\ & \hline 0 \end{aligned}$ | Current transfer ratio | $\mathrm{I}_{\mathrm{C}} / \mathrm{I}_{\mathrm{F}}$ | $\mathrm{V}_{\mathrm{CE}}=5 \mathrm{~V}, \mathrm{I}_{\mathrm{F}}=20 \mathrm{~mA}$ | 10 | - | 165 | \% |
|  | Collector-emitter saturation voltage | $\mathrm{V}_{\text {CE(sat) }}$ | $\mathrm{I}_{\mathrm{F}}=20 \mathrm{~mA}, \mathrm{I}_{\mathrm{C}}=1 \mathrm{~mA}$ | - | 0.15 | 0.4 | V |
|  | Rise time | $t_{r}$ | $\begin{aligned} & V_{C C}=5 \mathrm{~V}, I_{C}=2 \mathrm{~mA}, \\ & R_{L}=100 \Omega \end{aligned}$ | - | 6 | - | $\mu \mathrm{s}$ |
|  | Fall time | $\mathrm{t}_{\mathrm{f}}$ |  | - | 6 | - |  |

## Precautions

The following points must be borne in mind.

1. Soldering temperature: $260^{\circ} \mathrm{C}$ max

Soldering time: 5s max
(Soldering must be performed 1.5 mm under the package body.)
2. Clean only the soldered part of the leads. Do not immerse the entire package in the cleaning solvent.
3. Mount the device on a level surface.
4. Screws should be tightened to a clamping torque of $0.59 \mathrm{~N} \cdot \mathrm{~m}$.
5. The package is made of polycarbonate. Polycarbonate is usually stable with acid, alcohol and aliphatic hydrocarbons, however, with petrochemicals (such as benzene, toluene and acetone), alkalis, aromatic hydrocarbons, or chloric hydrocarbons, polycarbonate may crack, swell or melt.
Please take this into account when choosing a packaging material by referring to the table below.

## <Chemicals Which Should Not Be Used With Polycarbonate>

|  | Phenomenon | Chemicals |
| :---: | :---: | :---: |
| A | Staining and slight deterioration | - Nitric acid (diluted), hydrogen peroxide, chlorine |
| B | Cracking, crazed or swelling | - Acetic acid (70\% or more) <br> - Gasoline <br> - Methyl ethyl ketone, ethyl acetate, butyl acetate <br> - Ethyl methacrylate, ethyl ether, MEK <br> - Acetone, m-amino alcohol, carbon tetrachloride <br> - Carbon disulfide, trichloroethylene, cresol <br> - Thinners, oil of turpentine <br> - Triethanolamine, TCP, TBP |
| C | Melting <br> ( ): Used as solvent | - Concentrated sulfuric acid <br> - Benzene <br> - Styrene, acrylonitrile, vinyl acetate <br> - Ethylenediamine, diethylenediamine <br> - (Chloroform, methyl chloride, tetrachloromethane,dioxane, 1, 2-dichloroethane) |
| D | Decomposition | - Ammonia water <br> - Other alkalis |

6. Conversion efficiency falls over time due to current which flows in the infrared LED. When designing a circuit, take into account this change in conversion efficiency over time.
The ratio of fluctuation in conversion efficiency to fluctuation in infrared LED optical output is $1: 1$.

$$
\frac{\mathrm{I}_{\mathrm{C}} / \mathrm{I}_{\mathrm{F}}(\mathrm{t})}{\mathrm{I}_{\mathrm{C}} / \mathrm{I}_{\mathrm{F}}(0)}=\frac{\mathrm{P}_{\mathrm{O}}(\mathrm{t})}{\mathrm{P}_{\mathrm{O}}(0)}
$$

## Package Dimensions

11-13D2
Unit : mm

Weight: 0.78 g (typ.)

Pin Connection

ID (ICEO) -Ta

Ambient temperature $\mathrm{Ta}\left({ }^{\circ} \mathrm{C}\right)$

## Relative Positioning Of Shutter And Device

For normal operation position the shutter and the device as shown in the figure below. By considering the device's detection direction characteristic and switching time, determine the shutter slit width and pitch.

Cross section between $A$ and $A^{\prime}$

## RESTRICTIONS ON PRODUCT USE

030619EAC

- The information contained herein is subject to change without notice.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA for any infringements of patents or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any patent or patent rights of TOSHIBA or others.
- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- TOSHIBA products should not be embedded to the downstream products which are prohibited to be produced and sold, under any law and regulations.
- GaAs(Gallium Arsenide) is used in this product. The dust or vapor is harmful to the human body. Do not break, cut, crush or dissolve chemically.
