

155/622 Mb/s SMQW Pigtailed Laser Modules

Technical Data

LST2525 - 200 μ W Coaxial Laser LST2825 - 1 mW Coaxial Laser

Features

- Strained Multi Quantum Well (SMQW) Fabry Perot laser chip
- Low threshold and operating current
- Wide Operating Temperature Range
- Optical Power up to 1 mW
- Modulation Capability up to 622 Mb/s

Applications

- Telecommunications
- Fiber in the loop
- Inter/Intra Office
- SONET/SDH
- Datacommunications
- Switches

Description

Products in the SMQW pigtailed laser module family consist of a coaxial style package operating in the 1300 nm wavelength region and coupling light to single mode fiber. They are designed for use in short, medium and long distance networks with bit rates up to 622 Mb/s.

The device features a high reliability SMQW Fabry Perot laser diode and rear facet monitor photodiode. These are electrically connected to four pins in an industry- standard configuration.

Environmental performance is designed to be compatible with the requirements of Bellcore's TA-NWT-000983 document.

If the specific arrangement or performance you require is not listed, please contact your local representative as our highly flexible design and manufacturing processes allow both physical and electro-optical customization to meet your needs.

Laser Safety Warning

This device is a Class IIIa (3a) Laser Product. It may emit invisible laser radiation if operated with the fiber pigtail disconnected. To avoid possible eye damage do not look into an unconnected fiber pigtail during laser operation. Do not exceed specified operating limits.

Absolute Maximum Ratings

Stresses in excess of the absolute maximum ratings can cause catastrophic damage to the device. Limits apply to each parameter in isolation, all other parameters having values within the recommended operating conditions. It should not be assumed that limiting values of more than one parameter can be applied to the product at the same time. Exposure to the absolute maximum ratings for extended periods can adversely affect device reliability.

Parameter	Symbol	Test Condition	Limits		Unit
			Min.	Max.	
Laser Forward Current	If	DC		120	mA
Laser Reverse Voltage	Vlr	DC		2	V
Photodiode Reverse Voltage	Vr	DC		20	V
