

SIM Card EMI Filter Array with ESD Protection

Features

- Functionally and pin compatible with CMD's CSPEMI400
- *OptiGuard*™ coated for improved reliability at assembly
- Three channels of EMI filtering, each with ESD protection
- Two additional channels of ESD-only protection
- $\pm 10\text{kV}$ ESD protection (IEC 61000-4-2, contact discharge) on all pins
- $\pm 25\text{kV}$ ESD protection (HBM)
- Greater than 30dB of attenuation at 1GHz
- 10-bump, 1.960mm x 1.330mm footprint Chip Scale Package (CSP)
- Chip Scale Package features extremely low lead inductance for optimum filter and ESD performance
- Lead-free version available

Applications

- SIM Card slot in mobile handsets
- I/O port protection for mobile handsets, notebook computers, PDAs, etc.
- EMI filtering for data ports in cell phones, PDAs or notebook computers

Product Description

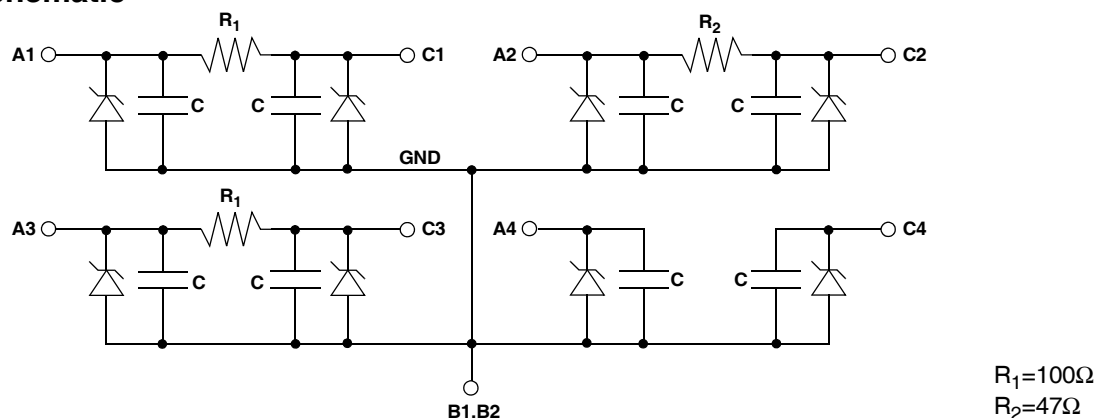

CAMD's CM1402 is an EMI filter array with ESD protection, which integrates three pi filters (C-R-C) and two additional channels of ESD protection. The CM1402 has component values of 20pF-47 Ω -20pF, and 20pF-100 Ω -20pF. The parts include avalanche-type ESD diodes on every pin, which provide a very high level of protection for sensitive electronic components that may be subjected to electrostatic discharge (ESD). The ESD diodes connected to the filter ports are designed and characterized to safely dissipate ESD strikes of $\pm 10\text{kV}$, beyond the maximum requirement of the IEC 61000-4-2 international standard. Using the MIL-STD-883 (Method 3015) specification for Human Body Model (HBM) ESD, the pins are protected for contact discharges at greater than $\pm 25\text{kV}$.

The ESD diodes on pins A4 and C4 ports are designed and characterized to safely dissipate ESD strikes of $\pm 10\text{kV}$, well beyond the maximum requirement of the IEC 61000-4-2 international standard.

This device is particularly well suited for portable electronics (e.g. mobile handsets, PDAs, notebook computers) because of its small package format and easy-to-use pin assignments. In particular, the CM1402 is ideal for EMI filtering and protecting data lines from ESD for the SIM card slot in mobile handsets.

The CM1402 incorporates *OptiGuard*™ coating which results in improved reliability at assembly. The CM1402 is available in a space-saving, low-profile Chip Scale Package with optional lead-free finishing.

Specifications

ABSOLUTE MAXIMUM RATINGS

PARAMETER	RATING	UNITS
Storage Temperature Range	-65 to +150	°C
DC Power per Resistor	100	mW
DC Package Power Rating	300	mW

STANDARD OPERATING CONDITIONS

PARAMETER	RATING	UNITS
Operating Temperature Range	-40 to +85	°C

ELECTRICAL OPERATING CHARACTERISTICS¹

SYMBOL	PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
R ₁	Resistance of R ₁		80	100	120	Ω
R ₂	Resistance of R ₂		38	47	56	Ω
C	Capacitance	V _{IN} = 2.5VDC, 1MHz, 30mV ac	16	20	24	pF
V _{STANDOFF}	Stand-off Voltage	I = 10μA		6.0		V
I _{LEAK}	Diode Leakage Current	V _{BIAS} = 3.3V		0.1	1.0	μA
V _{SIG}	Signal Voltage					
	Positive Clamp	I _{LOAD} = 10mA	5.6	6.8	9.0	V
	Negative Clamp	I _{LOAD} = -10mA	-1.5	-0.8	-0.4	V
V _{ESD}	In-system ESD Withstand Voltage	Notes 2,4 and 5				
	a) Human Body Model, MIL-STD-883, Method 3015		±25			kV
	b) Contact Discharge per IEC 61000-4-2		±10			kV
V _{CL}	Clamping Voltage during ESD Discharge MIL-STD-883 (Method 3015), 8kV	Notes 2,3,4 and 5				
	Positive Transients				+12	V
	Negative Transients				-7	V
f _{C1}	Cut-off frequency Z _{SOURCE} = 50Ω, Z _{LOAD} = 50Ω	R = 100Ω, C = 20pF		77		MHz
f _{C2}	Cut-off frequency Z _{SOURCE} = 50Ω, Z _{LOAD} = 50Ω	R = 47Ω, C = 20pF		85		MHz

Note 1: T_A=25°C unless otherwise specified.

Note 2: ESD applied to input and output pins with respect to GND, one at a time.

Note 3: Clamping voltage is measured at the opposite side of the EMI filter to the ESD pin. For example, if ESD is applied to Pin A1, then clamping voltage is measured at Pin C1.

Note 4: Unused pins are left open

Note 5: The parameters are guaranteed by design.

Application Information

The CM1402 provides a bidirectional filter and protector for all the signals and the power line on the SIM (subscriber identity module) card connector. SIM cards are found in all GSM cellular phones and in some other handheld devices or card readers. The ESD diodes protect the controller against possible ESD strikes that may occur when the connector pins are exposed during direct con-

tact, or during insertion of the SIM card into the card slot. The EMI filter suppresses all high-frequency noise, preventing the unwanted EMI signals from both entering and exiting the main board. The signals that interface with the SIM card are the Reset, the Clock and the bidirectional data I/O, as shown in [Figure 5](#).

Note: One channel of the CM1402 with a zener diode is not shown on the diagram.

Figure 5. Typical Application Diagram for the SIM Card Interface

For best filter and ESD performance, both GND bumps (B1, B2) of the CM1402 should be directly connected to the Ground plane. A small capacitor of about 1μF is required next to the V_{CC} pin of the SIM connector in order to improve stability of the SIM card supply rail.

For information on the assembly of the CM1402 to the PCB (printed circuit board), please refer to the Chip Scale Package (CSP) Application Note AP217, or contact factory at 800-325-4966 for technical support.

Application Information (cont'd)

Refer to Application Note AP-217, "The Chip Scale Package", for a detailed description of Chip Scale Packages offered by California Micro Devices.

PRINTED CIRCUIT BOARD RECOMMENDATIONS

PARAMETER	VALUE
Pad Size on PCB	0.275mm Round
Pad Definition	Non-Solder Mask defined pads
Solder Mask Opening	0.325mm Round
Solder Stencil Thickness	0.125 - 0.150mm
Solder Stencil Aperture Opening (laser cut, 5% tapered walls)	0.330mm Round
Solder Flux Ratio	50/50 by volume
Solder Paste Type	No Clean
Pad Protective Finish	OSP (Entek Cu Plus 106A)
Tolerance — Edge To Corner Ball	$\pm 50\mu\text{m}$
Solder Ball Side Coplanarity	$\pm 20\mu\text{m}$
Maximum Dwell Time Above Liquidous	60 seconds
Maximum Soldering Temperature for Eutectic Devices using a Eutectic Solder Paste	240°C
Maximum Soldering Temperature for Lead-free Devices using a Lead-free Solder Paste	260°C
