

Transshield CP2000 Series

Mechanical Details

all dimensions in millimetres

Case: transfer moulded plastic package

Terminals: axial leads, solderable to IEC 68-2-54

Ratings

P_{SM}	Maximum non-repetitive peak pulse power (10/1000 μ s)	1.5 kW
P_{tot}	Total continuous power dissipation @ $T_{lead}=100$ °C	5.0 W
I_{SM}	Maximum non-repetitive peak pulse current (10/1000 μ s)	See tables
V_R	Stand-off voltage	See tables
T_j	Maximum junction temperature	175 °C
T_{stg}	Storage temperature range	-55 to +175 °C
t_{on}	Turn-on time (theoretical)	$1 \times 10E-12$ sec

CP2000 Series

NOTES:

1. Vbr measured at test current of 1mA for all devices above 8V and 10mA below 8V.
2. Surge current waveform: 10/1000 usec s.c.
3. All parameters measured at 25 deg C
4. For device voltages outside the range in the table above, contact the nearest sales office, distributor or representative

In the interest of improved product design, changes to the foregoing device specification may be made at any time. Please contact the nearest Transshield suppressor sales office, distributor or representative for recent specification changes and advice on specific applications. HTA does not accept any liability arising out of the issue of any product described in this publication.
