

UM3522G Simple Piano (Electronic Keyboard IC)

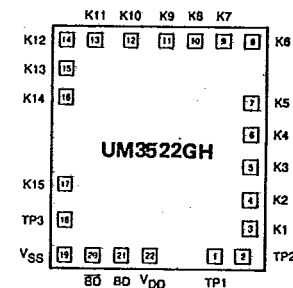

Features

- 3V to 4.5V operating voltage range
- Low power consumption
- Built-in oscillator, no external components needed.
- 15 key application (G4 ~ G6)
- Direct piezo-drive capability
- A magnetic speaker can be driven by connecting an NPN transistor
- First-key priority
- Automatic power-off function

Pin Configuration

Pad Configuration

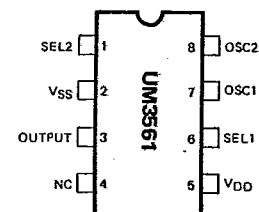

UM3561 Three Siren Sound Generator

Features

- Four sounds can be selected
- Typical 3V operating voltage
- RC oscillator with an external resistor
- A magnetic speaker can be driven by connecting an NPN transistor
- Power on reset

Pin Configuration

Pad Configuration
