

A Wide Lineup of 248 nm, 365 nm and 436 nm Type

The C6080 series is a compact UV power meter specifically designed to measure the intensity of UV radiation emitted from the light guide output end of a UV spot light source. The C6080 uses a UV sensor that exhibits stable sensitivity even after long exposure to UV radiation, allowing reliable measurement with good repeatability. As a useful option, an adapter for clamping the light guide output end is also available.

FEATURES

- Compact and lightweight
- Excellent accuracy
- Absolute value display of UV intensity (mW/cm^2)
- Easy-to-read digital display
- Sensor head isolated from display unit allows flexible measurement.
- 200-hours continuous operation by 9 V battery (006P)
- External output (analog output)

APPLICATIONS

- UV intensity measurement of UV curing and UV ink light sources
- UV intensity measurement of various UV spot light sources

UV POWER METERS C6080 SERIES

SPECIFICATIONS

Parameter		C6080-02	C6080-03	C6080-04	C6080-13	Unit
Sensitive Area		φ 6	φ 1			mm
Sensitive Wavelength Range		230 to 270	320 to 400	380 to 480	320 to 400	nm
Calibrated Wavelength		248	365	436	365	nm
Optical Power	SENS. L	1 to 1999			10 to 19990	mW/cm²
Measurement Range *	SENS. H	0.1 to 199.9			1 to 1999	
Display		3-1/2 digits Liquid crystal digital display				—
Sampling Interval		2.5				times/s
External Output (analog)		1.000 V per liquid crystal display "1000"				—
Operating Temperature Range		0 to +50				°C
Power Requirement		9 V battery (006P) 1 piece				—
Current Consumption		2				mA Max.
Weight	Sensor Head (including cable)	Approx. 100				g
	Display Unit (including battery)	Approx. 200				
Carrying Case Size (W × H × D)		330 × 70 × 230				mm

* Sensitivity is calibrated at the specific calibration wavelength, so the display value may vary when used to measure light source emissions on a different spectrum. This is the recommended calibration period (every 1 year) when high reliability is required. Please contact to our sales office for re-calibration fee.

Figure 2: Dimensional Outline (Unit: mm)

* External output connector plug: PJ-3057-P (Sato Parts) or equivalent

TPT A0021EC

Figure 3: Light Guide Clamp Adapter (Option) Dimensional Outline (Unit: mm)

TPT A0027EA

* Adapters for furcated light guide are also available.

* This adapter is designed to measure UV intensity under constant conditions, at a point 10 mm away from the light guide output end.
