

# 5V Step-Down Switching Regulator

## FEATURES

- Fixed 5V Output
- 2A On-Board Switch
- 100kHz Switching Frequency
- 2% Output Voltage Tolerance Over Temperature
- Greatly Improved Dynamic Behavior
- Available in Low Cost 5-Lead Package
- Only 9.5mA Quiescent Current
- Operates Up to 60V Input

## APPLICATIONS

- 5V Output Buck Converter
- Tapped Inductor Buck Converter with 4A Output at 5V
- Positive-to-Negative Converter

## DESCRIPTION

The LT1076-5 is a 2A fixed 5V output monolithic bipolar switching regulator which requires only a few external parts for normal operation. The power switch, all oscillator and control circuitry, all current limit components, and an output monitor are included on the chip. The topology is a classic positive “buck” configuration but several design innovations allow this device to be used as a positive-to-negative converter, a negative boost converter, and as a flyback converter. The switch output is specified to swing 40V below ground, allowing the LT1076-5 to drive a tapped inductor in the buck mode with output currents up to 4A.

The LT1076-5 uses a true analog multiplier in the feedback loop. This makes the device respond nearly instantaneously to input voltage fluctuations and makes loop gain independent of input voltage. As a result, dynamic behavior of the regulator is significantly improved over previous designs.

On-chip pulse by pulse current limiting makes the LT1076-5 nearly bust-proof for output overloads or shorts. The input voltage range as a buck converter is 8V to 60V, but a self-boot feature allows input voltages as low as 5V in the inverting and boost configurations.

The LT1076-5 is available in a low cost 5-lead TO-220 package with frequency pre-set at 100kHz and current limit at 2.6A. See Application Note 44 for design details.

## TYPICAL APPLICATION

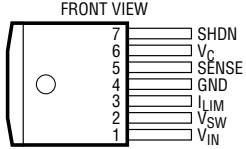

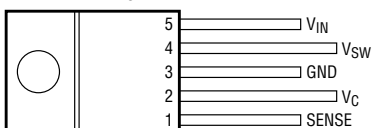

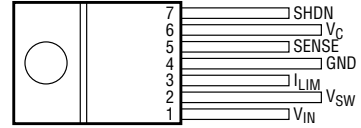

Basic Positive Buck Converter

## ABSOLUTE MAXIMUM RATINGS

Input Voltage	
LT1076-5 .....	45V
LT1076HV-5 .....	64V
Switch Voltage with Respect to Input Voltage	
LT1076-5 .....	64V
LT1076HV-5 .....	75V
Switch Voltage with Respect to Ground Pin	
( $V_{SW}$ <b>Negative</b> )	
LT1076-5 (Note 5) .....	35V
LT1076HV-5 (Note 5) .....	45V
Sense Pin Voltage .....	-2V, 10V
Maximum Operating Ambient Temperature Range	
LT1076C-5, LT1076HVC-5 .....	0°C to 70°C
LT1076I-5, LT1076HVI-5 .....	-40°C to 85°C
Maximum Operating Junction Temperature Range	
LT1076C-5, LT1076HVC-5 .....	0°C to 125°C
LT1076I-5, LT1076HVI-5 .....	-40°C to 125°C
Maximum Storage Temperature .....	-65°C to 150°C
Lead Temperature (Soldering, 10 sec) .....	300°C

					50	$\mu\text{A}$
Shutdown Thresholds	Switch Duty Cycle = 0 Fully Shut Down		2.2	2.45	2.7	V
			0.1	0.30	0.5	V
Thermal Resistance Junction to Case					4	$^\circ\text{C}/\text{W}$

The ● denotes specifications which apply over the full operating temperature range.

**Note 1:** To calculate maximum switch “on” voltage at currents between low and high conditions, a linear interpolation may be used.

**Note 2:** A sense pin voltage ( $V_{SENSE}$ ) of 5.5V forces the  $V_C$  pin to its low clamp level and the switch duty cycle to zero. This approximates the zero load condition where duty cycle approaches zero.

**Note 3:** Total voltage from  $V_{IN}$  pin to ground pin must be  $\geq 8\text{V}$  after start-up for proper regulation. For  $T_A < 25^\circ\text{C}$ , limit = 5V.

**Note 4:** Switch frequency is internally scaled down when the sense pin voltage is less than 2.6V to avoid extremely short switch on times. During current limit testing,  $V_{SENSE}$  is adjusted to give a minimum switch on time of 1 $\mu\text{s}$ .

**Note 5:** Switch to input voltage limitation must also be observed.

**Note 6:**  $V_{MAX} = 40\text{V}$  for the LT1076-5 and 60V for the LT1076HV-5.

**Note 7:** Error amplifier voltage gain and transconductance are specified relative to the internal feedback node. To calculate gain and transconductance from the Sense pin (Output) to the  $V_C$  pin, multiply by 0.44.

**Note 8:** Does not include switch leakage.

**Note 9:**  $I_{LIM} \approx \frac{R_{LIM} - 1\text{k}}{5\text{k}}$

# PACKAGE DESCRIPTION

Dimensions in inches (millimeters) unless otherwise noted.

## R Package, 7-Lead Plastic DD

## T Package, 5-Lead TO-220

## Y Package, 7-Lead TO-220
