

General Description

The LR324 consists of four independent, high gain and internally frequency compensated operational amplifiers. It is specifically designed to operate from a single power supply. Operation from split power supply is also possible and the low power supply current drain is independent of the magnitude of the power supply voltages.

The LR324 series are Compatible with Industry standard 324.

The LR324 series are available in 2 Packages: DIP-14 and SOIC-14.

Features

- Internally Frequency Compensated
