Description

The MA4E1339 series is a silicon, medium barrier Schottky diode suitable for use in mixer or detector circuits.

Applications

The MA4E1339 family of silicon Schottky diodes may be used in mixer or detector circuits. The MA4E1339A-287T, MA4E1339A-1146T, and MA4E1339A-1141T are suitable for use in single ended mixers or single diode detectors. The MA4E1339B-287T and MA4E1339B-1146T are suitable for use in single balanced mixers or voltage doubler detectors. The MA4E1339E-1068T may be used in temperature compensated detectors, single balanced mixers or double balanced mixers.

The MA4E1339 series of Schottky diodes is available in the SOT-23 (case style 287), the SOT-143 (case style 1068), the SOT-323 (case style 1146) and the SOD-323 (case style 1141) packages. These packages are supplied on tape and reel for automatic pick and place assembly on surface mount circuit boards, as indicated by a "T" to the case style suffix.
