

## 800MHz BAND MIXER GaAs MMIC

### ■GENERAL DESCRIPTION

NJG1551F is a mixer GaAs MMIC featured low distortion, high conversion gain and low noise figure.

NJG1551F includes a mixer and a local amplifier, and ideally suitable for 800MHz band digital mobile phone handsets.

The very small MTP package is adopted.

### Cautions on using this product

This product contains Gallium-Arsenide (GaAs) which is a harmful material.

- Do NOT eat or put into mouth.
- Do NOT dispose in fire or break up this product.
- Do NOT chemically make gas or powder with this product.
- To waste this product, please obey the relating law of your country.

### [CAUTION]

The specifications on this databook are only given for information, without any guarantee as regards either mistakes or omissions. The application circuits in this databook are described only to show representative usages of the product and not intended for the guarantee or permission of any right including the industrial rights.

This product may be damaged with electric static discharge (ESD) or spike voltage. Please handle with care to avoid these damages.
