

NARROW BAND FM IF IC

■ GENERAL DESCRIPTION

The NJM2292 is a narrow band FM IF IC designed for use in cordless telephones and amateur radios, etc...It contains almost all blocks of the narrow band FM IF system—a mixer, an IF amplifier, an RSSI and a Quadrature detector, for example. It features low supply current to make a sharp reduction of total power consumption possible.

■ FEATURES

- Low Operating Voltage (1.8~7.0V)
- Low Operating Current (20mA typ. @ $V^+=2.4V$)
- Maximum input frequency (100MHz)
- A ceramic discriminator is available
- Package Outline SSOP20
- Bipolar Technology

■ APPLICATIONS

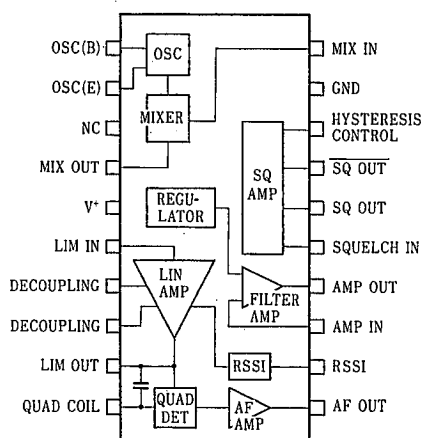

- Amateur radios
- Cordless telephones, etc.
