

Optical Emitter and Sensor Pair

OPB100Z, OPB100EZ, OPB100SZ

Features:

- 890 nm infrared LED emitter
- Silicon phototransistor sensor
- Snap-in mounting
- Variable sensing distance over 36" (91.4 cm)
- Low profile package
- 24" (61.0 cm) wire leads

Description:

The **OPB100** series consists of an infrared LED (**OPB100EZ**) and phototransistor (**OPB100SZ**) in separate plastic housings. The low cost, snap-in design requires no screws or other mounting hardware for ease of installation.

The emitter and sensor are not apertured, which allows separation distances in excess of 36" (91.4 cm) without concern for precise alignment. The front side clip allows mounting of the product to any 0.062" (1.57 mm) thick material.

This product is designed for general switching and low-speed data communications applications.

Applications:

- Non-contact reflective object
- Non-contact interruptive sensing
- Assembly line automation
- Machine automation
- Machine safety
