LC 7815

**2-Pole 4-Position Analog Function Switch**

The LC7815 is a 2-pole 4-position analog function switch with 2 built-in C-MOS analog switches (LC4066 type). A soft touch of a button enables switchover of the input signal source of an audio amplifier.

**Use**

Function switchover of amplifier, receiver, etc. (2 poles 4 positions)

**Features**

1. Good distortion characteristic because of built-in analog switches of LC4066 type. Distortion 0.01 % max./  $V_{in} = 1V_{rms}$ ,  $V_{DD} = 15$  to  $18V$
2. Capable of outputting audio muting control signal to minimize noise to be generated at the time of switchover
3. Built-in controller for tape monitor switchover (using LC4066B together)
4. Built-in driver for LED which displays function mode, tape monitor mode
5. Since control input can be operated from + supply alone when using dual supplies, interface with other circuits can be achieved easily.
6. Since audio muting control signal can be triggered independently from external pin ( $MUTE_{in}$ ); audio muting at the time of return from backup can be achieved easily.
7. Control input pin (**RESET**) to be used for turning OFF all analog switches
8. Backup can be performed easily because of C-MOS structure. (Backup voltage: 3 V min.)
9. Operating voltage: 4.5 to 18.0 V/single supply,  $\pm 4.5$  to  $\pm 9.0$  V/dual supplies
10. Package: DIP-28 (Shrink type)

**Pin Assignment**

The application circuit diagrams and circuit constants herein are included as an example and provide no guarantee for designing equipment to be mass-produced. The information herein is believed to be accurate and reliable. However, no responsibility is assumed by SANYO for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

## Sample Application Circuits

### 1. Dual-supply operation/without tape monitor function

### 2. Dual-supply operation/with tape monitor function

Connect a capacitor when using in the surroundings with much noise.

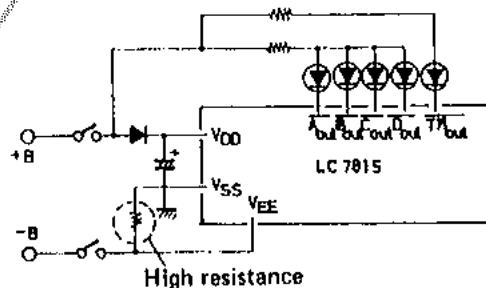

### 3. Single-supply operation

For using tape monitor function, make connection as shown in 2 above.

### 4. Backup

#### (1) Dual-supply operation

#### (2) Single-supply operation
