FUNCTIONAL BLOCK DIAGRAM

GENERAL DESCRIPTION

The TC1031 is a low power, complimentary output comparator plus voltage reference designed specifically for low power applications.

The TC1031 is designed for operation from a single supply, however, operation from dual supplies is also possible, and the power supply current drain is independent of the magnitude of the power supply voltage. Maximum supply current is 6μA and operation is guaranteed to $V_{DD} = 1.8V$. The input common mode range includes ground and the output swing is rail-to-rail.

Packaged in a space-saving SOT23A-5*, the TC1031 is ideal for applications requiring high integration, small size and low power.
