PIN CONFIGURATIONS

GENERAL DESCRIPTION

The TC9491 (1.220V output) bipolar, two-terminal, bandgap voltage references offer precision performance without premium price. These devices do not require thin-film resistors, greatly lowering manufacturing complexity and cost.

A 50ppm/°C output temperature coefficient and a 15μA to 20mA operating current range make these devices attractive for multimeter, data acquisition converter, and telecommunication voltage references.
