

12-36GHz Frequency Multiplier

GaAs Monolithic Microwave IC

Description

The CHX1094 is a cascaded frequency multiplier by 3 monolithic circuit. It is designed for a wide range of applications, from military to commercial communication systems. The backside of the chip is both RF and DC grounds. This helps simplify the assembly process.

The circuit is manufactured with a P-HEMT process, 0.25µm gate length, via holes through the substrate, air bridges and electron beam gate lithography.
